TARIFF CRISIS

Join the fight for emergency supports

The US-Canada tariff war is causing job losses and panic in our communities.

Economists all agree the tariffs will have a devastating impact on our economy. But the government's current strategy of only giving money to corporations while offering only minor supports for a few groups of workers is not what we need to prevent an economic catastrophe.

Governments at all levels must take immediate action to provide income supports that are adequate and widely accessible. We need to **fix Employment Insurance and ensure everyone has at least $600/week to live on**.

Governments must also legislate a **freeze on evictions**, a **freeze on the price of food and rent**, and ensure **permanent rent control** for all tenants.

We also need **real investment in public services** and infrastructure to help offset job loss while also providing services that make life more affordable for all of us.

We need Employment Insurance (EI) to be fixed permanently so that this important safety net works for any crisis. An accessible and adequate EI system benefits everyone by making sure workers don't fall into deeper poverty or lose their housing.

But as it stands, only about 35% of unemployed workers are getting EI.

We need change NOW!

A workers-first agenda to protect communities
